PROJECT DETAILS

Henderson place features 42 residences that seamlessly blend architectural heritage with contemporary sophistication, redefining urban living.

Situated between Stockbridge and Canonmills, this contemporary development includes traditional building methods and ornate ironmongery, reflecting the historic significance of the area, the residence features private balconies, providing an exclusive outdoor retreat uncommon in the sought after location.

The decision to use Cemfloor Liquid Screed by Next Level UFH for this project was crucial in meeting the tight programme requirements. The product's quick drying times, ease of application, and superior performance characteristics provided an ideal solution, ensuring the project was completed on time and to the highest standards.

Next Level UFH Solutions provided a professional install covering over 5000m² with over 200m³ of material used including Cemfloor Therm and Cemfloor Level Plus, their key expertise in the industry made the whole process seamless from start to finish for all parties concerned.

The product was supplied by Cemfloor Channel Partner Grange Quarry
